

I am very happy that I had the opportunity to join the Canadian trip. I learned a lot and made many friends on the trip.

Firstly, I learnt a lot about the Canadian culture. For example, Canadians eat bread every day. I ate bread or sandwiches for breakfast. Before I went to Canada, I first thought they would eat a lot of meat.

Secondly, I became more confident to speak English after the trip. It is because when I lived in Canada, nobody spoke Chinese with me, and I needed to communicate with my host family, so I had to speak English. After two weeks, I became very brave to use English.

Thirdly, I learned how to look after myself. In Canada, mums and dads could not remain nearby to bring anything for me or help me to tidy up the room. Therefore, I had to do everything myself.

Apart from learning that, I also cultivated many friends such as Calla, Cara, Ed and so on. They were all a part of my host family. They brought me to go play everyday. For example, they took me to a garden where there were many flowers and trees. They took me to a park where an event was held. The event introduced many countries' foods. I am happy I could stay with them on this trip.

Joining the Canadian trip is a great experience and it made my life more affluent.
