

Last summer holiday, I went to Canada and lived with my friendly host family. It has been the most unforgettable memory in my whole life.

Firstly, I really enjoyed the wonderful trip which lasted for three weeks in July, especially the activities that my host family planned for us. I remembered that they brought us to the lake, and we had a delightful weekend. We went to catch the fish, swim in a lake, have a barbecue with their friends, and chatted with them cheerfully until midnight. Also, it let us have a foreign holiday that is totally different from Hong Kong. We had so much fun there. Each place caught our attention quickly and we were happy to go everywhere.

Secondly, it is a great opportunity to go traveling to another country. Also, we can communicate with the foreign people. As a result we can improve our listening and speaking skills a lot. After this long trip, I have more confidence to chat with foreigners and have interaction with them. These wholesome activities made much difference to our studies. Added to the above, every activity let us experience the culture in Canada. Each activity allowed me to unwind myself, and became a wonderful memory in my life.

Overall, I extremely enjoyed this trip. I really miss my host family and I think I must go back in the future. I thank the school for giving me this impressive opportunity, so that I could widen my horizons with this fabulous exchange program.
