

In 2009, I had a memorable holiday. I left my family for two weeks because I went to Canada. I lived with a host family in Canada. I met so many Canadians there. I had learnt a lot of English there and tried so many difficult activities that I would never try in Hong Kong.

In Canada, I lived with a host family who were very nice. They helped us to prepare our meals. They also cruised around with us. In my host family, there was a little boy, Declan. He was very cute. I loved to play with him.

I played tennis, beach volleyball, and mini golf. I also went to gymnastics, and figure skating. I also got to ride on a horse. The activities that I liked the most were playing baseball, and riding on the horse. Playing baseball is the activity that Canadians like the most. We used a baseball mitt and a baseball bat to play baseball. I think it was very interesting.

I liked riding on the horse because I think riding on the horse is very exciting. I was very scared of the horse, but now I think it was fun, I liked it very much. I also bought so many souvenirs from Canada.

Before I went to Canada, I was afraid of speaking English. When I went to Canada, I met so many Canadians. I talked with my host family, the Canadian students, and the teacher. I think they were very nice. I love everything that happened in Canada.
