Dear Principal, Teachers and Students of Ithymss,

As an alumnus of Ithymss, I am honored to write this note to my high school that plays a critical role in my life. I would not be writing to you as a scientist without the unyielding support of my teachers for the year I was attending. I would like to thank - individually, repeatedly and sincerely - Ithymss for having such an affable and competent team of teachers.

I especially thank Mr. Tang, my biology teacher, for inspiring me to make sense of the pieces of my own life's puzzle and to evolve with great determination and willingness to study biochemistry. I thank Mr. Lau and Mr. Chan, my physics and chemistry teacher respectively, for inspiring me to realize my thirst in science where I found that everything occurs in the universe can only be explained by evidence that is quenched by science.

Last but not least, I want to express my sincere gratitude to all of you for your gracious support and I thank the principal for providing a wonderful place to pursue education. For fellow students, I encourage all of you to try your best to live up our teachers' expectation, and I have faith in you. Thank you all.
